Julianne- I was wondering if you could help me with this issue. Do you have access to data/research that would show that runoff potential from ½ inch frozen ground would be far less than 2 inches of frozen ground? Thanks,

Sanjay K. Sofat

yes, there will still be a progress report and a public informational meeting however, it is no longer being planned to coincide with the public hearing on the NPDES permit for surface discharging private sewage disposal systems.
As soon as details regarding the public informational meeting are available I will share them with you.

There was mention over the past year of doing a public meeting on the Illinois CAFO program to coincide with the public hearing on the NPDES permit for

surface discharging private sewage disposal systems (scheduled for Nov. 1). Is that still the plan?
